

Muhammad Izaz Haider

Penetration Tester | Security Analyst | Offensive Security

mizazhaiderceh@gmail.com | +92 306 6150249 | Belgium (Remote / Hybrid / On-site)
mizazhaider-ceh.dev | linkedin.com/in/muhammad-izaz-haider | github.com/mizazhaider-ceh

PROFESSIONAL SUMMARY

Penetration tester and offensive security researcher with hands-on experience in **web application, network, and system penetration testing**, vulnerability assessment, and ethical hacking across freelance engagements, 3 internships, and 100+ practical labs. Practical exposure to **red-team techniques and exploit development** through CTFs and HackTheBox/TryHackMe. Skilled with Burp Suite, Nmap, Metasploit, and Kali Linux, and proficient in Python and Bash for security automation. Pursuing a BSc in Cybersecurity at Howest University, Belgium (16.40/20 GPA). Seeking an **entry-level / junior** penetration testing or security analyst role.

TECHNICAL SKILLS

Penetration Testing: Web Application Penetration Testing, Network Penetration Testing, System & Host Exploitation, Vulnerability Assessment, Ethical Hacking, Red Teaming, Exploit Development, OWASP Top 10, Privilege Escalation, Reconnaissance & Enumeration, Log & Traffic Analysis, Bug Bounty

Security Tools: Burp Suite, Nmap, Metasploit, Wireshark, SQLMap, ffuf, Gobuster, Kali Linux, Nikto, John the Ripper

Programming & Scripting: Python, Bash/Shell, C, C++, JavaScript, SQL

Security Engineering: Threat Modeling, Risk Assessment, Security Auditing, Secure Code Review, API Security, Cryptography

DevSecOps & Systems: DevSecOps, CI/CD Security, Docker, Git, Linux Administration, Windows Active Directory, AI/LLM Integration

Soft Skills: Technical Reporting & Documentation, Problem-Solving, Analytical Thinking, Communication, Self-Directed Learning

PROFESSIONAL EXPERIENCE

Security Engineer — Sustainability Platform (Freelance)

Nov 2025 – Jun 2026 | Belgium / Remote

- Executed application security testing on a live platform, uncovering and documenting [#] API and web vulnerabilities with reproducible, step-by-step remediation guides.
- Hardened CI/CD pipelines and Docker workloads against OWASP Top 10 attack vectors, embedding automated security checks into the deployment workflow.
- Engineered an LLM-assisted vulnerability scanner in Python that automated recurring security checks and cut report-generation time by ~ [#] %.

Offensive Security Intern — Rhombix Technologies

Mar 2025 – May 2025 | Remote · Part-time

- Built a Python network packet sniffer to capture and analyze traffic, strengthening protocol- and log-analysis fundamentals.
- Designed and delivered phishing-awareness training to [#] staff, measurably improving resilience to social-engineering attacks.

Cyber Security Intern — Prodigy InfoTech

Jan 2025 – Apr 2025 | Remote · Part-time

- Identified and documented vulnerabilities across web and network targets using an OWASP-aligned penetration-testing methodology.
- Engineered 5+ Python security tools and scripts that automated repetitive vulnerability-assessment tasks.

PROJECTS

- Ai-Terminal-X** — Open-source AI assistant automating offensive-security workflows from the CLI (Python); 30+ GitHub stars.
- Sub-Hunter** — Subdomain enumeration & attack-surface recon tool for the reconnaissance phase of engagements.
- PortBlitz** — Multithreaded high-speed port scanner for rapid network service discovery and enumeration.
- Icarus-X** — Offensive-security automation framework chaining common penetration-testing tasks.

LEADERSHIP & INITIATIVES

Founder — The PenTrix (Cybersecurity Learning Initiative)

2024 – Present

- Founded and lead an offensive-security education initiative offering roadmaps, labs, and AI-assisted mentoring; publish practical content on penetration testing, DevSecOps, and AI in cybersecurity.

EDUCATION

BSc in Cybersecurity — Howest University, Belgium (Sep 2025 – Present)

GPA 16.40/20 · 30/30 ECTS — first semester, all courses passed first attempt

Intermediate (I.C.S.), Computer Science — Grade A+ — Dawn Science College, Barnala · 2022 – 2024

Matriculation, Computer Science — Govt. High School for Boys, Hazara Mughlan · 2020 – 2022

CERTIFICATIONS

50+ professional certifications in cybersecurity and technology — issuers include **IBM, Google, and CompTIA** — spanning security fundamentals, networking, and offensive security.

ACHIEVEMENTS

- Featured on national television (ABN News Morning Show) as a "Next-Gen Technologist".
- Completed 100+ hands-on labs, CTF challenges, and practical security audits; 55+ GitHub stars across open-source security tools; recognized by the PakSphere tech community.
